

HOIST SYSTEM

KYNE SIDEWINDER HOIST SYSTEM

COS-740-001

System includes:

- winch
- frame
- winch rod
- drill
- 25 meter of rope
- shipping box

KOVACS ENTERPRISE CORING CHALLENGE

We are interested to know the maximum depth that our coring equipment has been used to successfully collect ice cores. We have awarded customers their choice of Kovacs Ice Drilling Equipment that meet this challenge.

The Australian Antarctic Division has reached 30 meters of depth using our coring system and received \$300 in Kovacs Ice Drilling Equipment. The next challenge is for the first team to successfully reach 40 meters. In doing so they will receive their choice of \$500 in our equipment.

The team must have reached these depths using Kovacs Ice Drilling Equipment. Verification of achieving these coring depths and acknowledgment of Kovacs Enterprise, LLC must be published in a scientific report available to the public. The customer will be responsible for the shipping costs for the awarded equipment.
